

Errata.pdf

AcadeMY Audit Source Pack - Sains Tingkatan 2 (BM)

Status: VERIFIED MIRRORED PUBLISHER-CORRECTION RECORD

1. Source identity

Target textbook	Sains Tingkatan 2 - Kurikulum Standard Sekolah Menengah
KPM identifier	KPM2017 / No. Siri Buku 0056
ISBN	978-967-14472-6-0
Publisher for KPM	Karangkraf Network Sdn. Bhd.
First publication	2017
Errata document located	Ralat Buku Teks Sains TG2 (8-page correction document)
Errata date	Not stated in the mirrored document

2. Provenance assessment

A correction document matching this exact textbook was located in multiple Malaysian science-teacher archives, including a Scribd mirror titled *Ralat Buku Teks Sains TG2* and a public Telegram teacher archive that separately labels the BM file as *RALAT BUKU TEKS SAINS KSSM F2 (BM)*. The mirrored document names the same textbook authors and repeatedly uses publisher-correction wording (“Pihak syarikat membuat pemurnian...” in the source).

No surviving copy hosted directly on an official KPM/Bahagian Buku Teks or Karangkraf domain was located during verification on 21 August 2026. Therefore this file must not be described as an official-hosted original. It is retained as a mirrored publisher-correction record for audit evidence.

Audit rule: DSKP remains the highest authority. Apply this errata only to the explicitly listed textbook items. Do not use it to infer unrelated corrections.

3. Corrections identified in the mirrored errata

Textbook page	Area	Correction / instruction recorded
53	Bab 3 - Nutrisi	Food-pyramid content is updated to the Malaysia Food Pyramid 2020 presentation. The errata notes a repositioning of the grain/staple group relative to vegetables and fruit, and adds guidance to limit ultra-processed foods.
71	Bab 3 - Nutrisi	The corresponding summative/reflection food-pyramid material is updated consistently with the Malaysia Food Pyramid 2020 arrangement.
151	Bab 7 - Keelektrikan dan Kemagnetan	Typographical correction: the procedure contains “sel kering”; it should read “sel kering”. This typo is present in the source textbook and was independently confirmed during source-pack verification.
173	Bab 8 - Daya dan Gerakan	The errata explicitly states that the box concerning Hukum Newton Ketiga is cancelled/removed. Treat that boxed material as withdrawn; do not generalise this instruction beyond the item explicitly identified.

4. Broken / obsolete QR-linked resources

The mirrored errata also flags multiple QR-linked resources as non-functioning or potentially removed. These are resource-link issues, not automatic corrections to the textbook’s core scientific content. The listed textbook pages include 6, 53, 55, 59, 77, 78, 81, 84, 129, 218 and 232.

5. Impact on Bab 1 - Biodiversiti

For Bab 1, the located errata does not list a core factual correction to the biodiversity teaching content. It flags the QR-linked Biodiversiti resource on textbook page 6 as non-functioning. Therefore Bab 1 academic QA should still be grounded primarily in DSKP + the KPM textbook, while treating that QR resource as unavailable.

6. Verification notes for Claude / Codex audit

- **Do not** treat this PDF as a substitute for the DSKP or textbook.
- When auditing pages 53, 71, 151 or 173, explicitly check the correction listed here before classifying AcadeMY content as correct/incorrect.
- For Bab 1, do not create a release blocker merely because the old QR resource is dead. Only block if AcadeMY itself exposes a broken learner-facing link or relies on the dead resource for required learning.
- If a later official KPM/Bahagian Buku Teks or Karang kraf-hosted errata is found, replace this verification record with that original and re-run the affected chapter audit.
- The audit must not extrapolate additional “errata” from teacher notes, social posts or unofficial worksheets.

7. Evidence used to prepare this record

Evidence	What it establishes
KPM textbook file in this source pack	Exact title, KPM2017 identifier, ISBN 978-967-14472-6-0, Karang kraf publisher, and the source-textbook wording.
Scribd mirror: “Ralat Buku Teks Sains TG2”	8-page correction document; publisher-correction wording; correction pages 53, 71, 151 and 173; QR-link notices.
Public Malaysian science-teacher Telegram archive	Independent circulation of a BM file explicitly labelled “RALAT BUKU TEKS SAINS KSSM F2 (BM)”.
Direct source-textbook check	Confirmed the page-151 typo “sel sering” in the original textbook procedure.

Prepared for AcadeMY-Audit-Sources/Science/Form-2/Errata.pdf on 21 August 2026. This is a provenance-preserving audit source record, not a claim that the mirrored PDF is currently hosted by KPM or Karang kraf.
